EXOTIC CRAFT FLOWER & INFUSIONS

KAVIAR HISTORY

In 2016, a small but passionate team sought to introduce the concept of a luxury brand to the maturing Colorado cannabis market. Through persistent testing and development of a proprietary formula, the KAVIAR Cone was born. Its sleek packaging and glass tip on every pre-roll elevated the smoking experience for consumers, and filled the potency void between lower THC testing traditional flower and higher THC testing concentrates. Customers began asking for KAVIAR at dispensaries throughout the state of Colorado, and KAVIAR soon became available at hundreds of dispensaries statewide.

With the immense popularity of KAVIAR spawning in such a short time, the team invested heavily in marketing at industry events, interacting with customers directly at dispensaries, and cultivating an engaging following on social media. Kaviar continued to grow with the sponsorship of major events including the DOPE Cup and Denver 420 Festival, as well as winning data-driven LeafLink Awards for Fastest Growing Brand, Best Selling Pre-Roll, and Best Selling Concentrate.

Capitalizing on this success in Colorado, KAVIAR has expanded to new markets across the United States and Jamaica, and has become a recognized and respected luxury brand across the country. It's often said that in order for a product to be successful, it either has to be the first or the best. KAVIAR is both.

KAVIAR STYLE

Several years in the making, we've poured our passion and dedication into crafting a line of clothing that redefines style with bold threads and elevated streetwear.

We believe in fashion that's as unique as you are. Our designs are a celebration of individuality, blending streetwise aesthetics with a touch of sophistication. From statement tees that demand attention to meticulously crafted outerwear that exudes confidence, every piece in our collection fosters the perfect balance of comfort and class.

We invite you to explore our exclusive range of apparel and accessories, designed to make you stand out from the crowd.

- Kaviar 5 Pack Minis (3g)

02

Moonrocks

- Kaviar 1g Moonrocks
- Moondust

03

Exotic Craft Flower

- Pheno-Hunted Strains

INFUSED PRE-ROLLS

Kaviar Cones are a connoisseur favorite and have been a staple in the medical and recreational cannabis markets since 2016. Rolling 1.5g of our proprietary blend of strain-specific flower, oil, and kief into a glass-tipped cone, our slow-burning infused pre-rolls are lovingly crafted in the name of luxury. Filling the potency void between traditional flower and concentrates, our Kaviar cones are the smoothest and most reliable product available on the market.

Kaviar offers the only 1.5g infused cone in the Illinois market.

KAVIAR

MOONROCKS

Moonrocks are whole cannabis nugs dipped in hash oil and then covered in kief. As they are ultimately just concentrated cannabis, moonrocks produce one of the most potent highs that marijuana offers.

MOONDUST

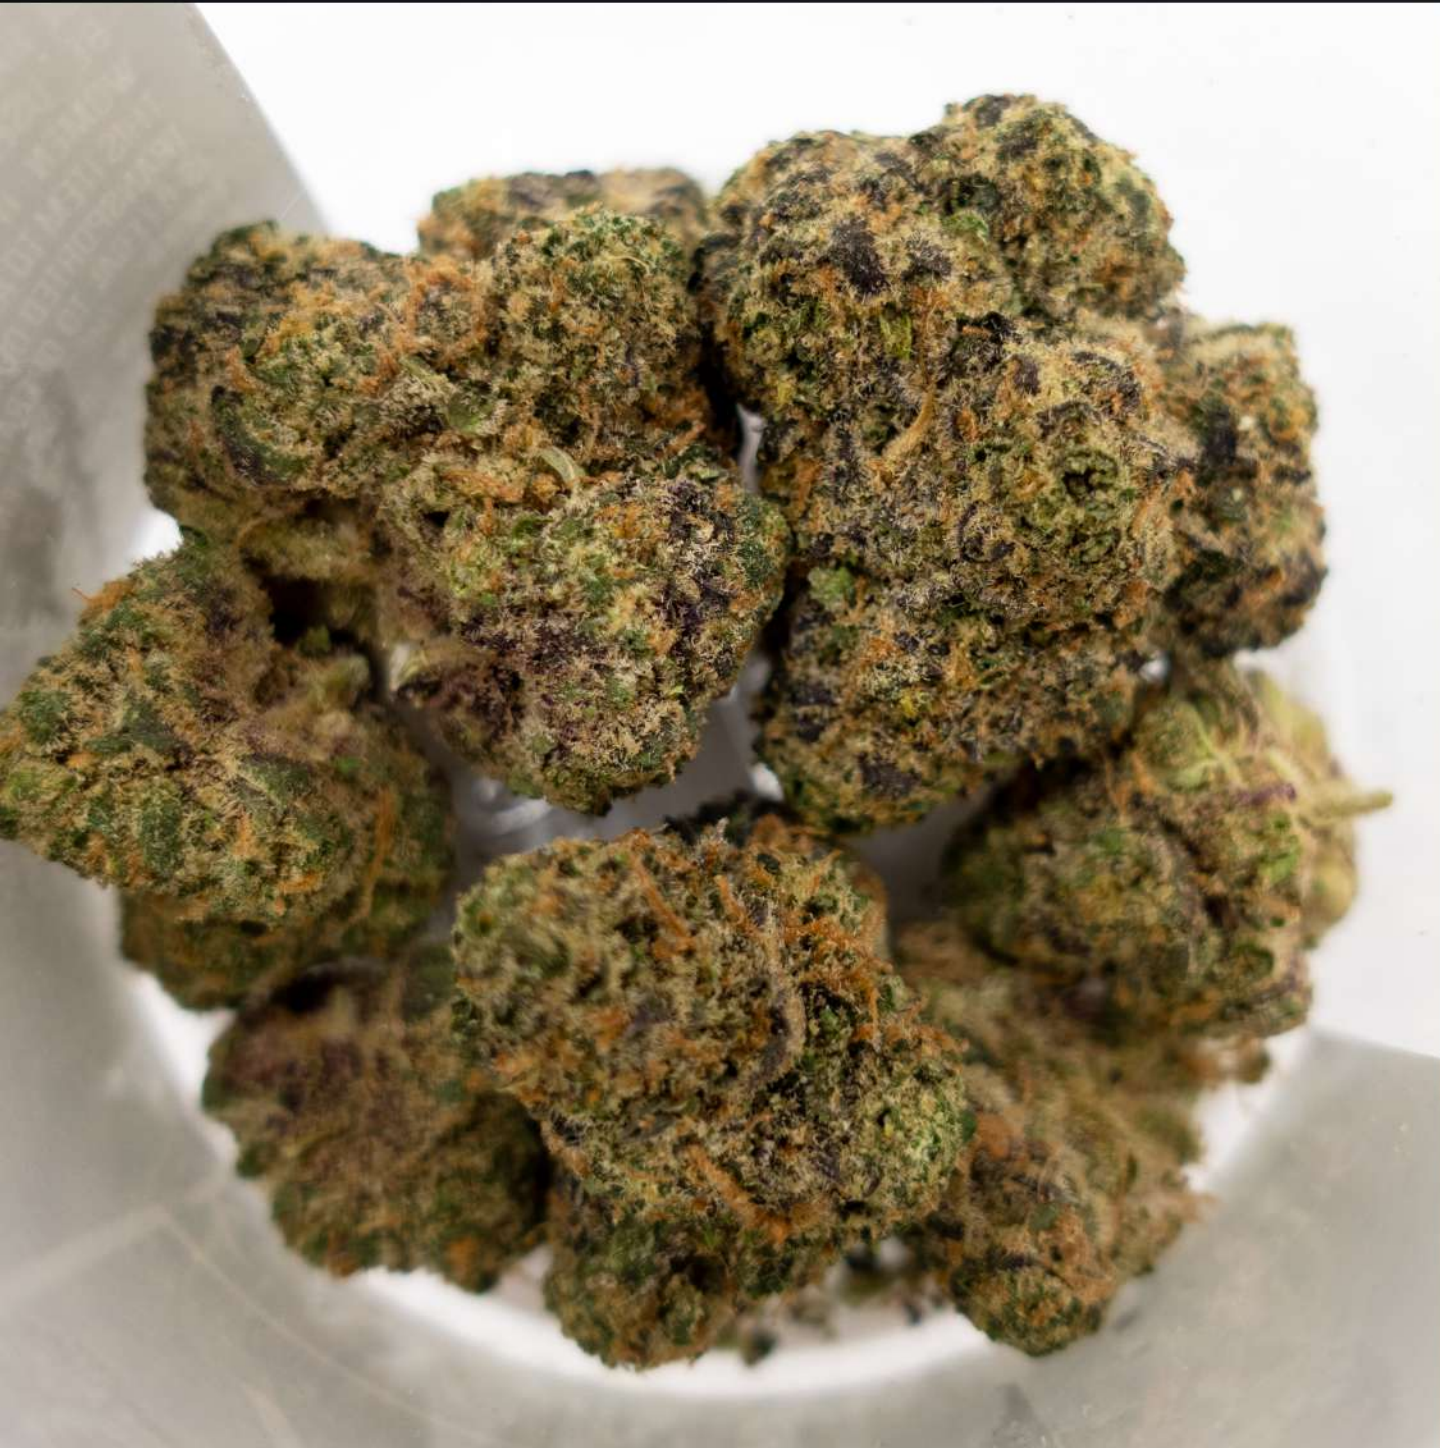

The same blend of Kaviar flower, oil, and kief that goes into our 1.5g joints and mini joints is now available in loose form. Sprinkle it on top of your bowl of flower or add a kick to your next joint with a pinch of Moondust!

 **KAVIAR**

EXOTIC CRAFT FLOWER

ABOUT OUR GROW

Kaviar Exotic Craft Flower is the most consistent, terpene-rich cannabis on the market. We take pride in our Exotic Craft Flower being 100% hand trimmed. From seed to sale, our 'quality over quantity' approach ensures the most premium, potent, and fresh flower in Illinois. Kaviar Exotic Craft Flower is only available in small batches that must exceed our strict quality standards.

THE KAVIAR DIFFERENCE

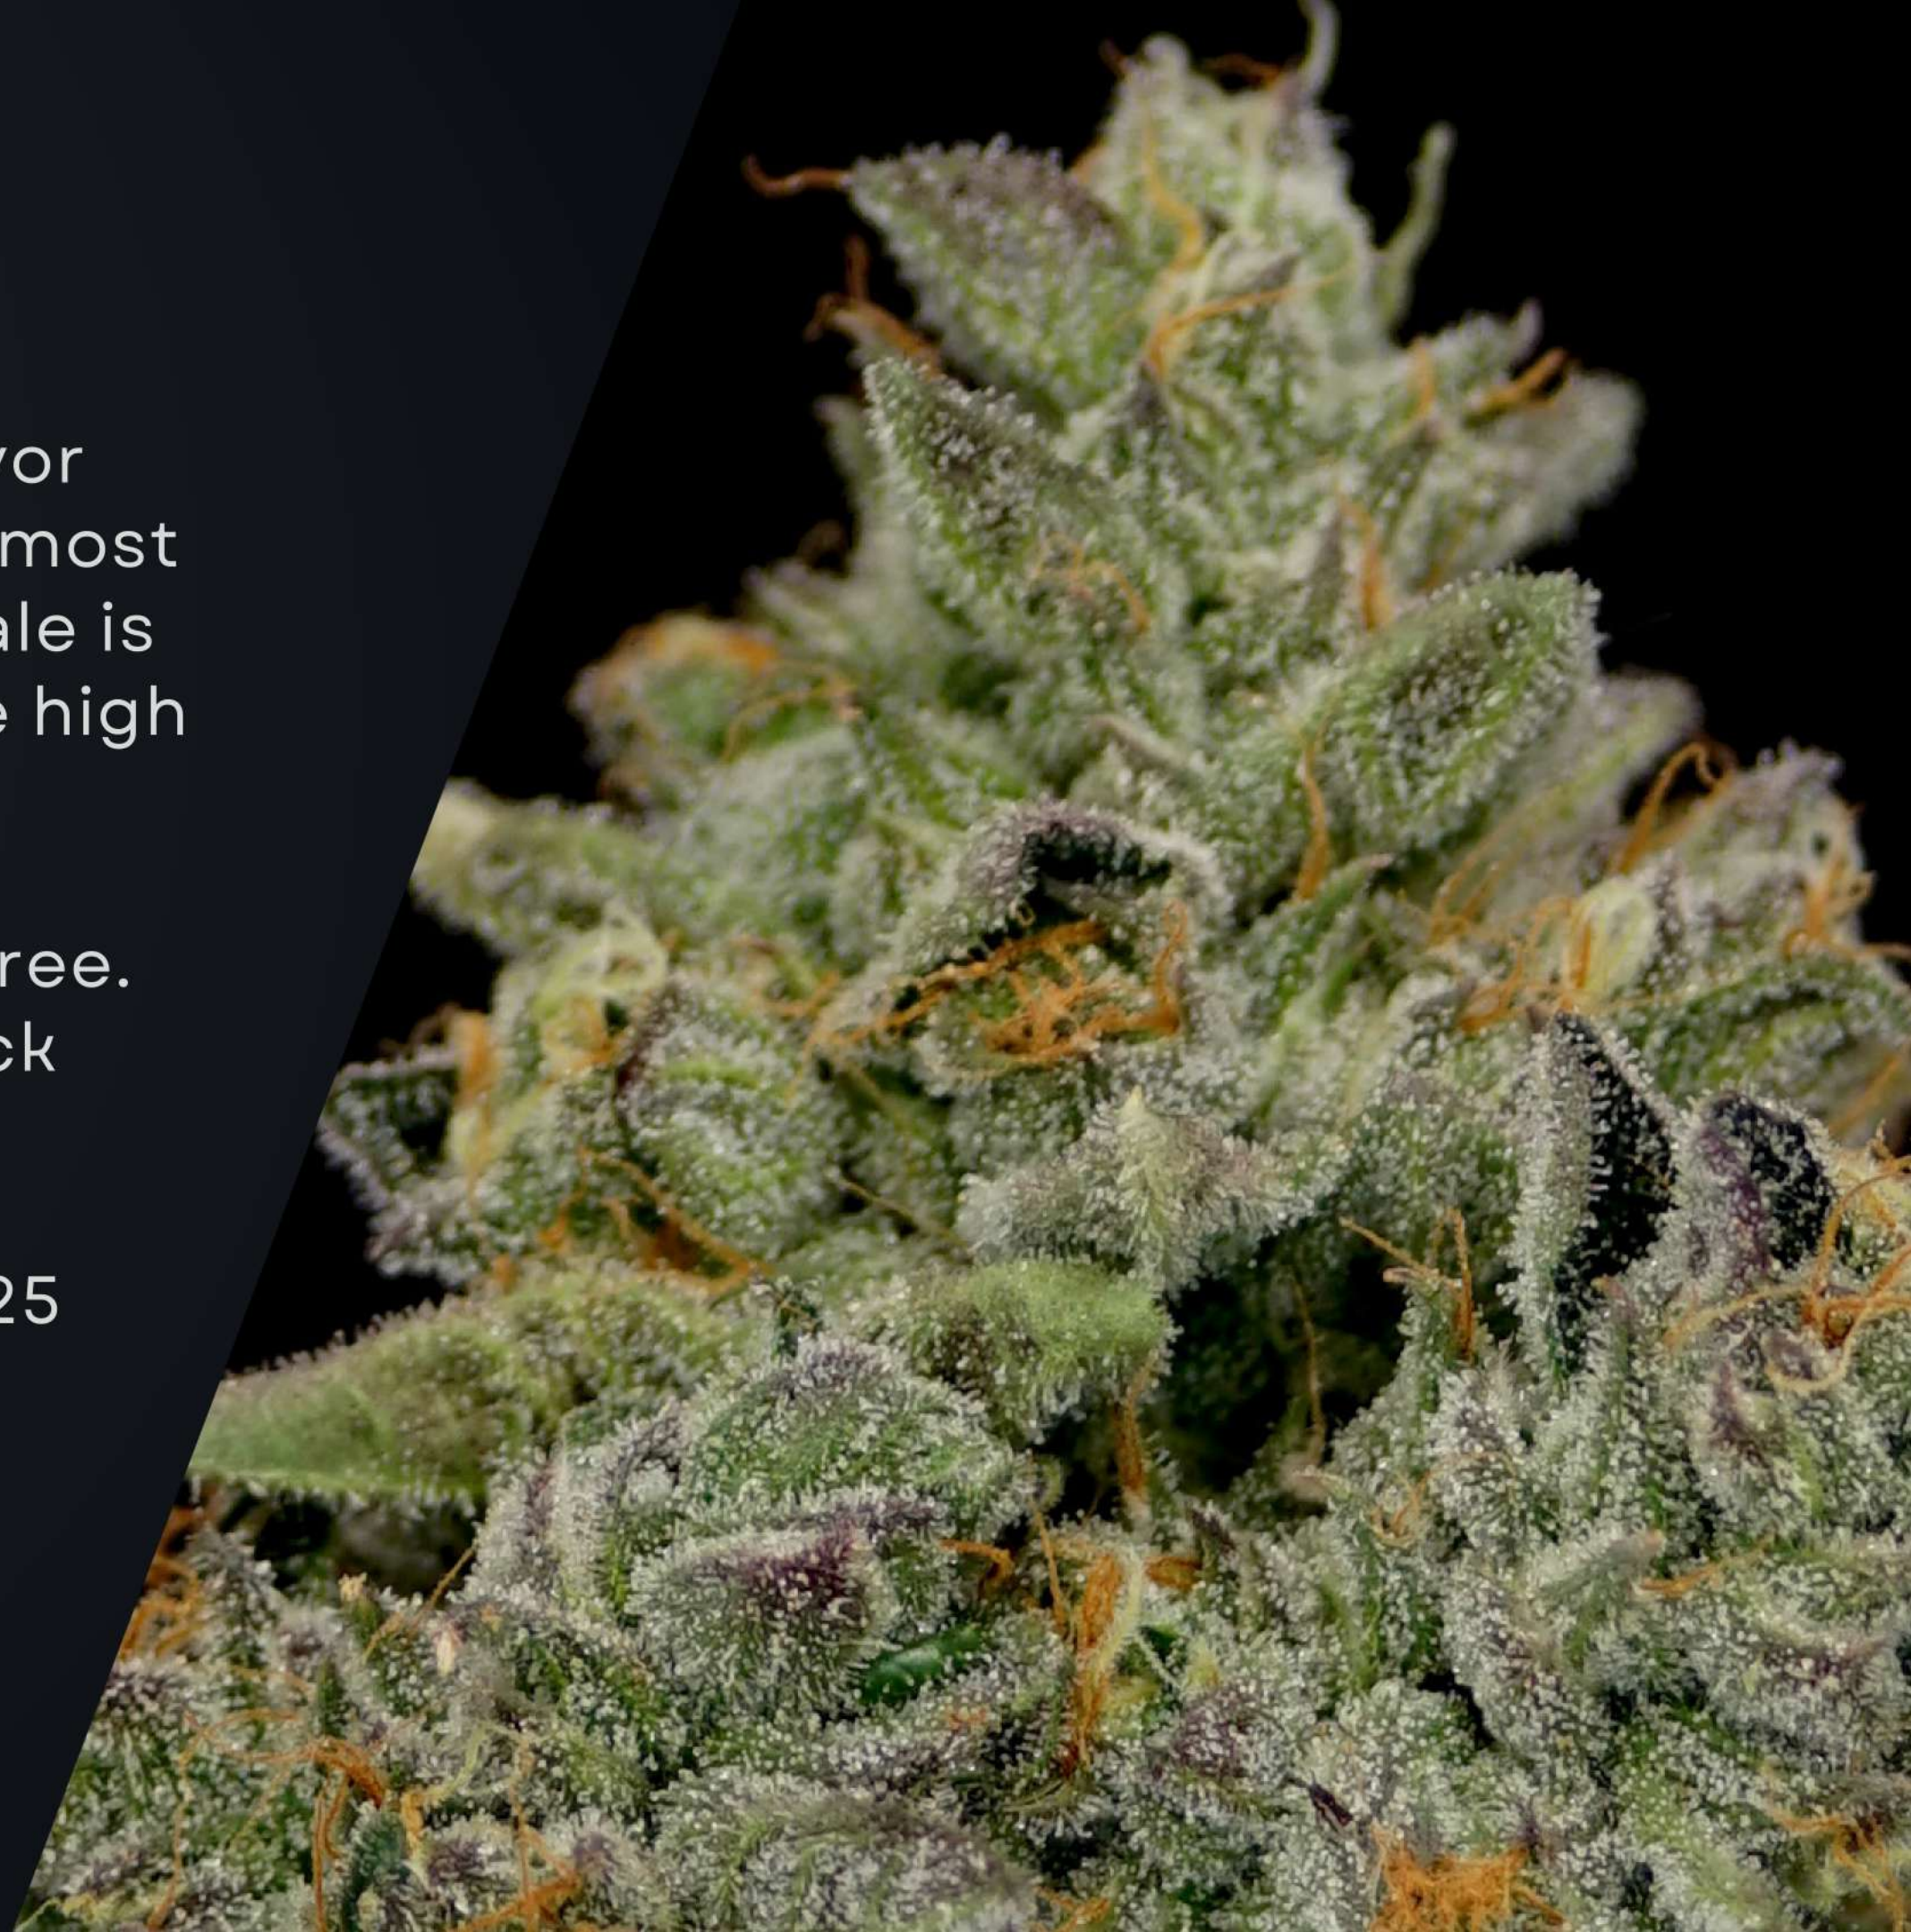

- 1)** At the Kaviar grow, our all-encompassing approach values the whole cannabis plant, and goes beyond simply testing our flower for THC. We aim to provide consumers with a premium smoking experience that includes not only heightened THC levels, but prioritizes diverse terpene profiles that uniquely enhance the effects of each strain.
- 2)** Our craft grow is focused on hand-selected strains that are picked for their quality over quantity, with above average terpene profiles and THC content.
- 3)** The average amount of terpenes in cannabis flower is 0.5%. Our standards for Kaviar flower routinely tests at a minimum of 2% terpenes.
- 4)** We hire 1 grower for every 1,000 sqft to maintain a high level of accuracy and control when dealing with plant manicures and defoliation.
- 5)** Our efforts are two-fold, to grow flower with high enough quality to include in our Kaviar joints, but also to be enjoyed by the entire recreational market.

Biscotti (Hybrid)

Biscotti has a gassy cookie dough flavor much like a Biscoff cookie. The gas is most prevalent on the inhale while the exhale is a sweet doughy tea biscuit flavor. The high on this one is soaring for the first few minutes with a beautiful plateau of contentment, happiness, and stress free. Biscotti has the potential to couch lock you into happiness.

Lineage: South Florida OG X Gelato #25

Terpene Profile: Diesel/Vanilla

Blue Unicorn Poop (Indica)

Blue unicorn stinks. The aroma is of spoiled milk crossed with funky feet. The inhale is fruity and sweet. The exhale is cheesy and gassy. It has a dark leaf profile with purple and red hues with orange hairs. The buzz is quick to set in and has immediate relief to the muscles while having an uplifting effect on the mind. Mood enhancing, relaxing, and uplifting.

Lineage: Blue Sherbert x Unicorn Poop

Terpene Profile: Fruity/Cheesy

Bubba Dough (Hybrid)

Pre '98 Bubba Kush has a knack for reducing stress and elevating your overall mood. This pheno of Grape Jubilee captures the mood enhancement while embracing the terp profile of “grapes” and “cream”. She’s got everything; bag appeal, great buzz, and a terp profile that’s unique to Illinois.

Lineage: (P98 Bubba Kush X Dj Shorts Blueberry) X Cereal Milk

Terpene Profile: Fruity/Creamy

Cornbread (Indica)

Cornbread is an old-school OG Kush combined with old-school Bubba Kush. The terpene profile is spicy/incense like with an OG flavor rounding out the exhale. This one drives you deep into bliss. Your body starts immediately to become relaxed and then soon after the sleep will find you.

Lineage: Bubba Kush X Rare Dankness #2

Terpene Profile: Lemon/Spicy

Devil Driver (Sativa)

Devil Driver is a creamy cultivar with subtle purple and red colors. It stands out among the rest visually as its colors mix together like a rainbow. The trichomes shine like glass. The flavors are subtle grape cream and citrus. The buzz is an uplifting, soothing, and creative sativa.

Lineage: Melonade X Sundae Driver

Terpene Profile: Pine/Earthy

Flava Ganga (Sativa)

Flava Ganga has a gassy fruit fusion. It's a light green and red strain with an uplifting buzz. This strain's highest terpene tested was myrcene, thought to elongate buzz, and linalool which affects serotonin. Mood enhancing, giggly, and uplifting.

Lineage: Dat Flava

Terpene Profile: Diesel/Fruity

Forbidden Razittles (Sativa)

Forbidden Razittles has a diesel aroma mixed with raspberry and grape cream undertones. The inhale has a sweet taste while the exhale is cheesy and earthy. With a light green and red color profile; its crystal structure stands out. Cheerful, euphoric, and relaxing.

Lineage: Forbidden Zkittles X Razzberry
Boogie S1

Terpene Profile: Diesel/Berry

Gary Dough (Indica)

Power gave us a third pheno that has a unique profile and look. This one smells like Biscotti but looks like Gary Peyton. It has a distinct Vanilla note that's unlike its sisters.

Lineage: Gary Peyton x Scotty 2 Hotty
Bred by Exotic Genetics

Terpene Profile: Rubber/Sweet

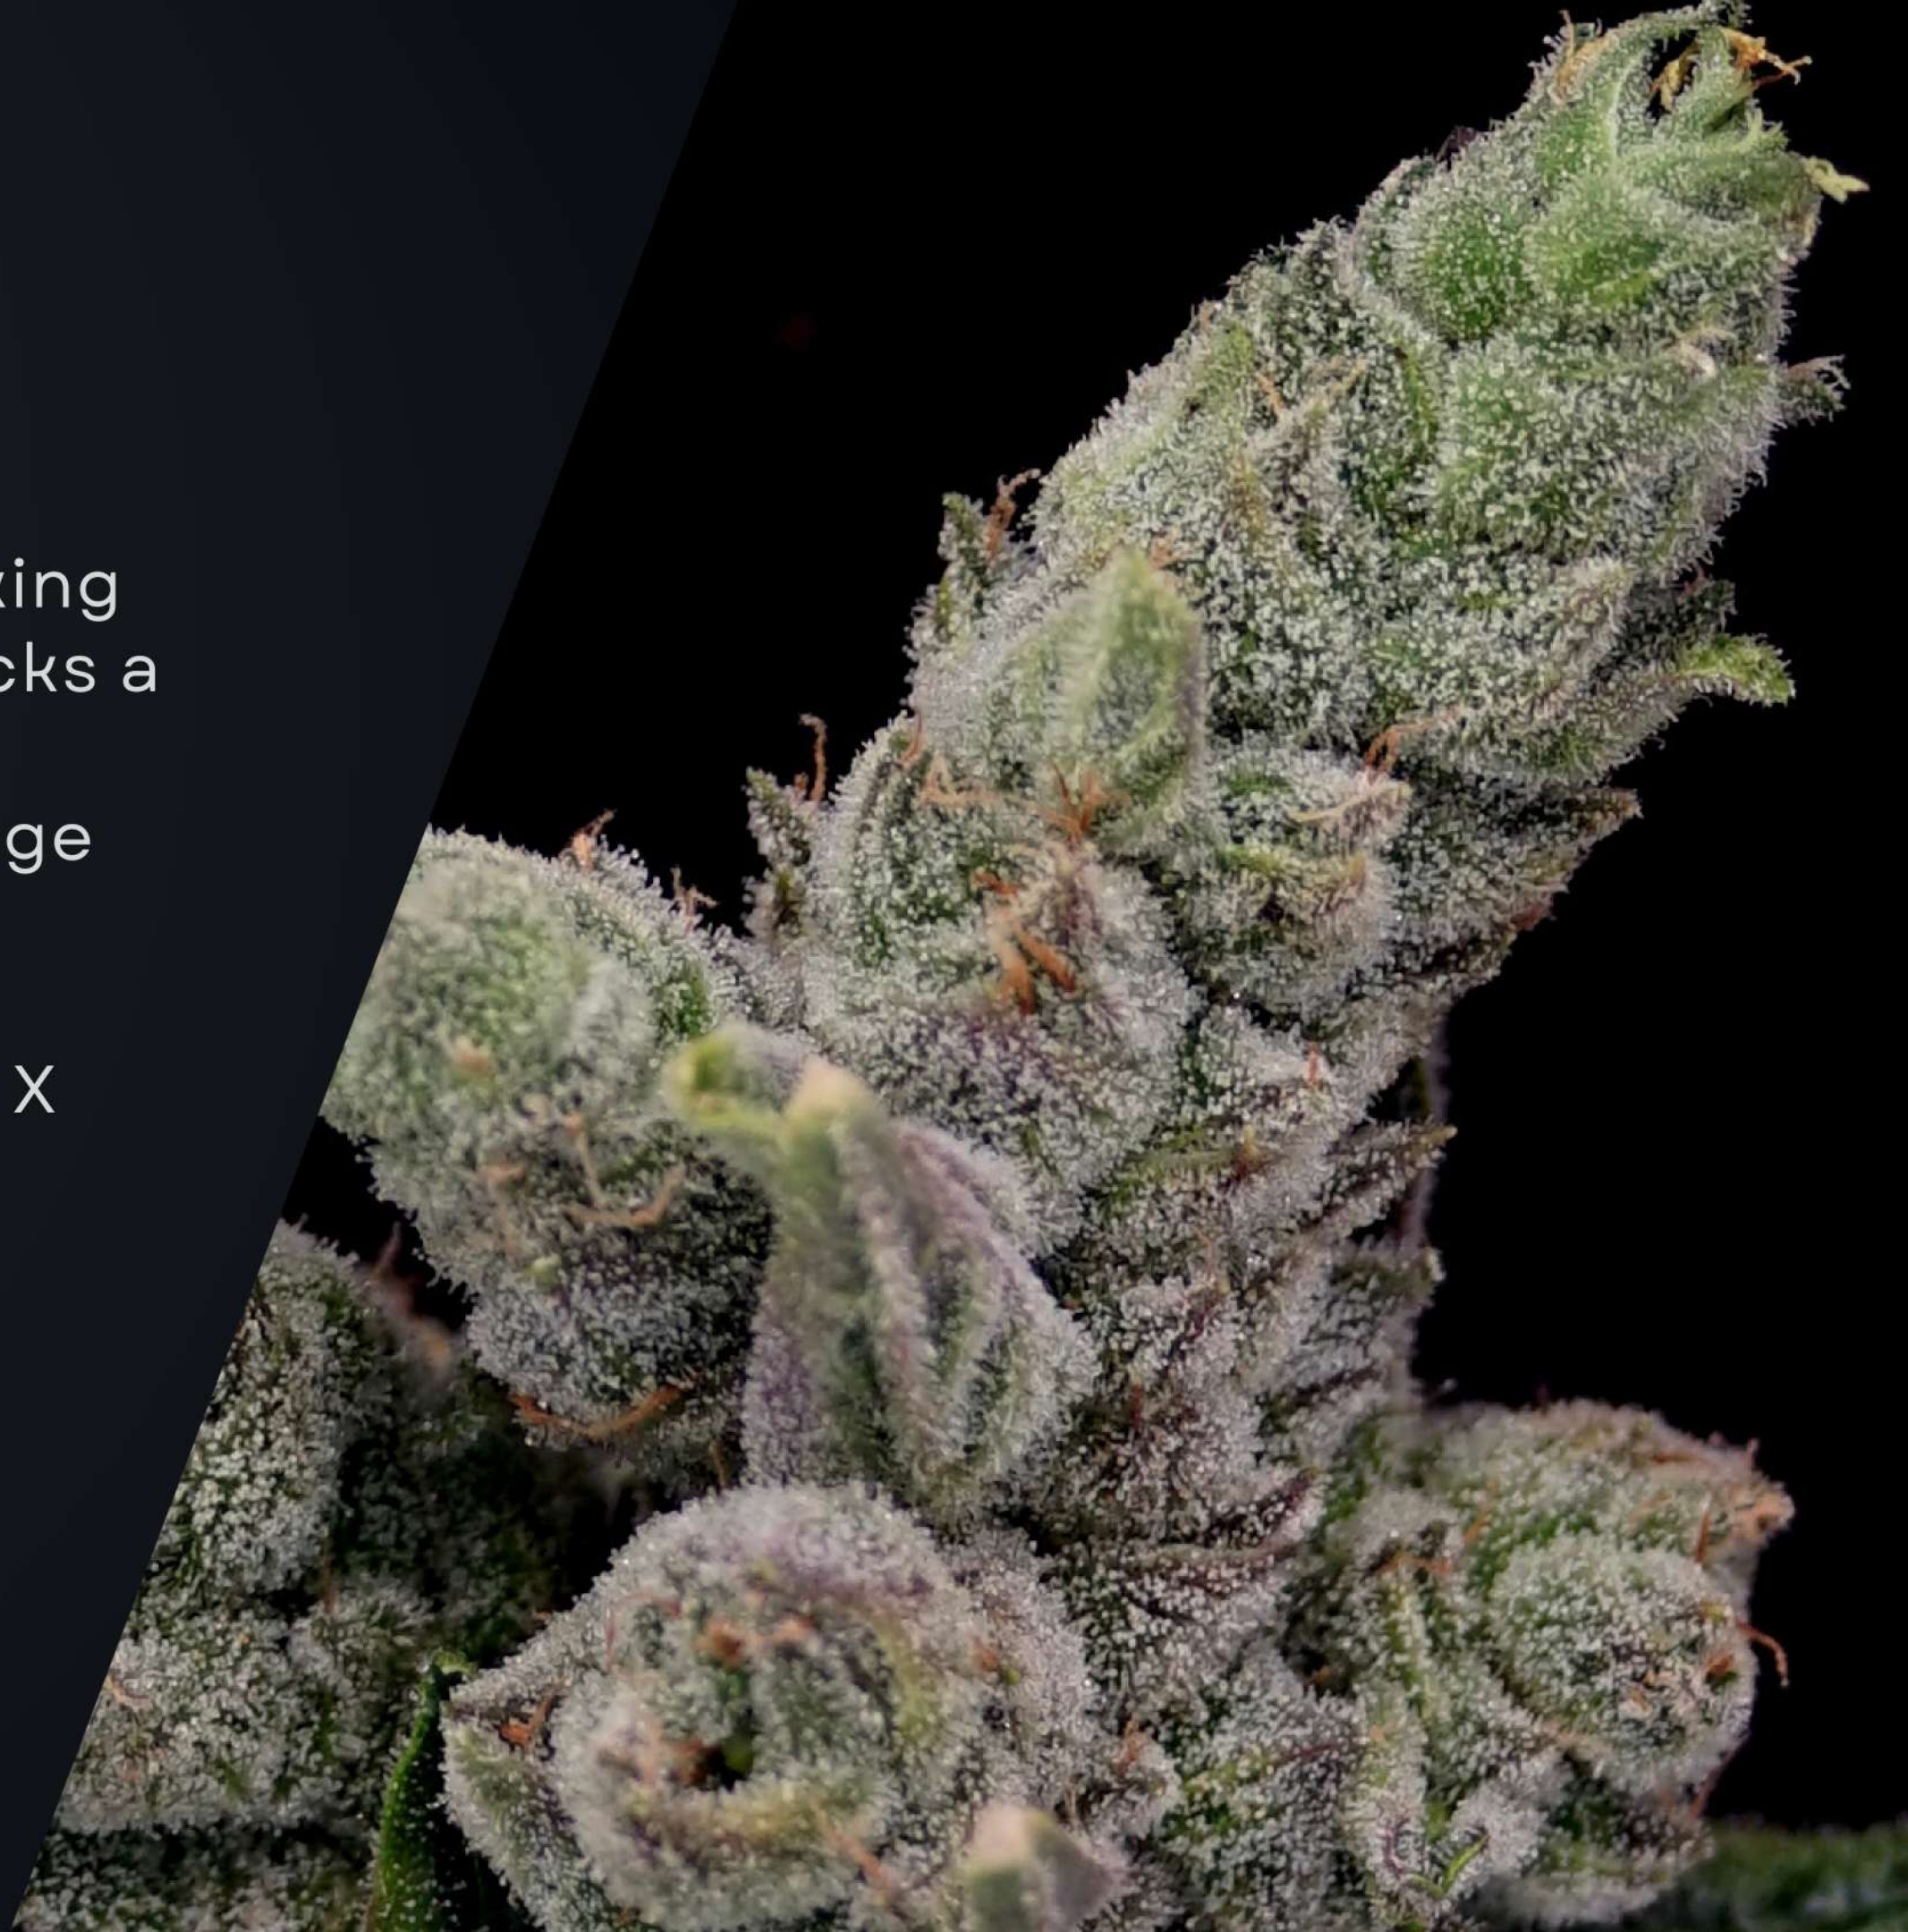

GG4 (Hybrid)

GG #4 is a staple among smokers looking for mood altering cultivars. GG #4 packs a punch with its cerebral top end while allowing the body to relax. Flavors range from piney to spicy.

Lineage: (Sour Dubb X Chem's Sister) X Chocolate Diesel

Terpene Profile: Spicy/Pine

Grand Master Sexy (Indica)

GMS has all the loud terps from both parents. The cookie side comes with the typical sweet cookie dough flavor but the Biscotti terps are really prevalent in the cross. The Oreoz side adds the chocolatey undertones and are almost visual. This strain is couch lock from the start and will help you nap, be hungry, and reduce your pain.

Lineage: Oreoz X Scotty 2 Hotty

Terpene Profile: Fruity/Creamy

Grape Jubilee (Indica)

Grape Jubilee is a strong Cereal Milk strain that combines the infamous Cereal Milk with Berry Bubba. Adding a berry overtone to the sweet milk odor this strain is heady finds its users with the munchies.

Lineage: Berry Bubba X Cereal Milk

Terpene Profile: Berry/Creamy

Lusty Lady (Hybrid)

Lusty Lady is a special cultivar, rose water notes and blackberry pungence come through with this strain with a slight licorice note. Expect a body elevation and a palette cleansing experience. The crystals shine on this one, the heads are so large you can see them with the naked eye.

Lineage: Bahama Mama X Red Runtz

Terpene Profile: Fruity/Vanilla

Moon Blend (Hybrid)

Moonblend combines Runtz and Devil Driver to create an uplifting experience with a wide range of flavors from sweet fruits to sour lemons. The headspace this strain occupies is uplifting, happy, and a sense of well being.

Lineage: Space Runtz X Devil Driver Bred by Collaboration with Tiki Madman and Clearwater Genetics

Terpene Profile: Fruity/Diesel

Oreo Dough (Indica)

Another pheno of Grand Master Sexy that's all Oreo with a Scotty terp. A very well mixed and unique profile. This pheno will bulldoze right over you with a heavy/sedative buzz.

Lineage: Oreoz X Scotty 2 Hotty

Terpene Profile: Vanilla/Coffee

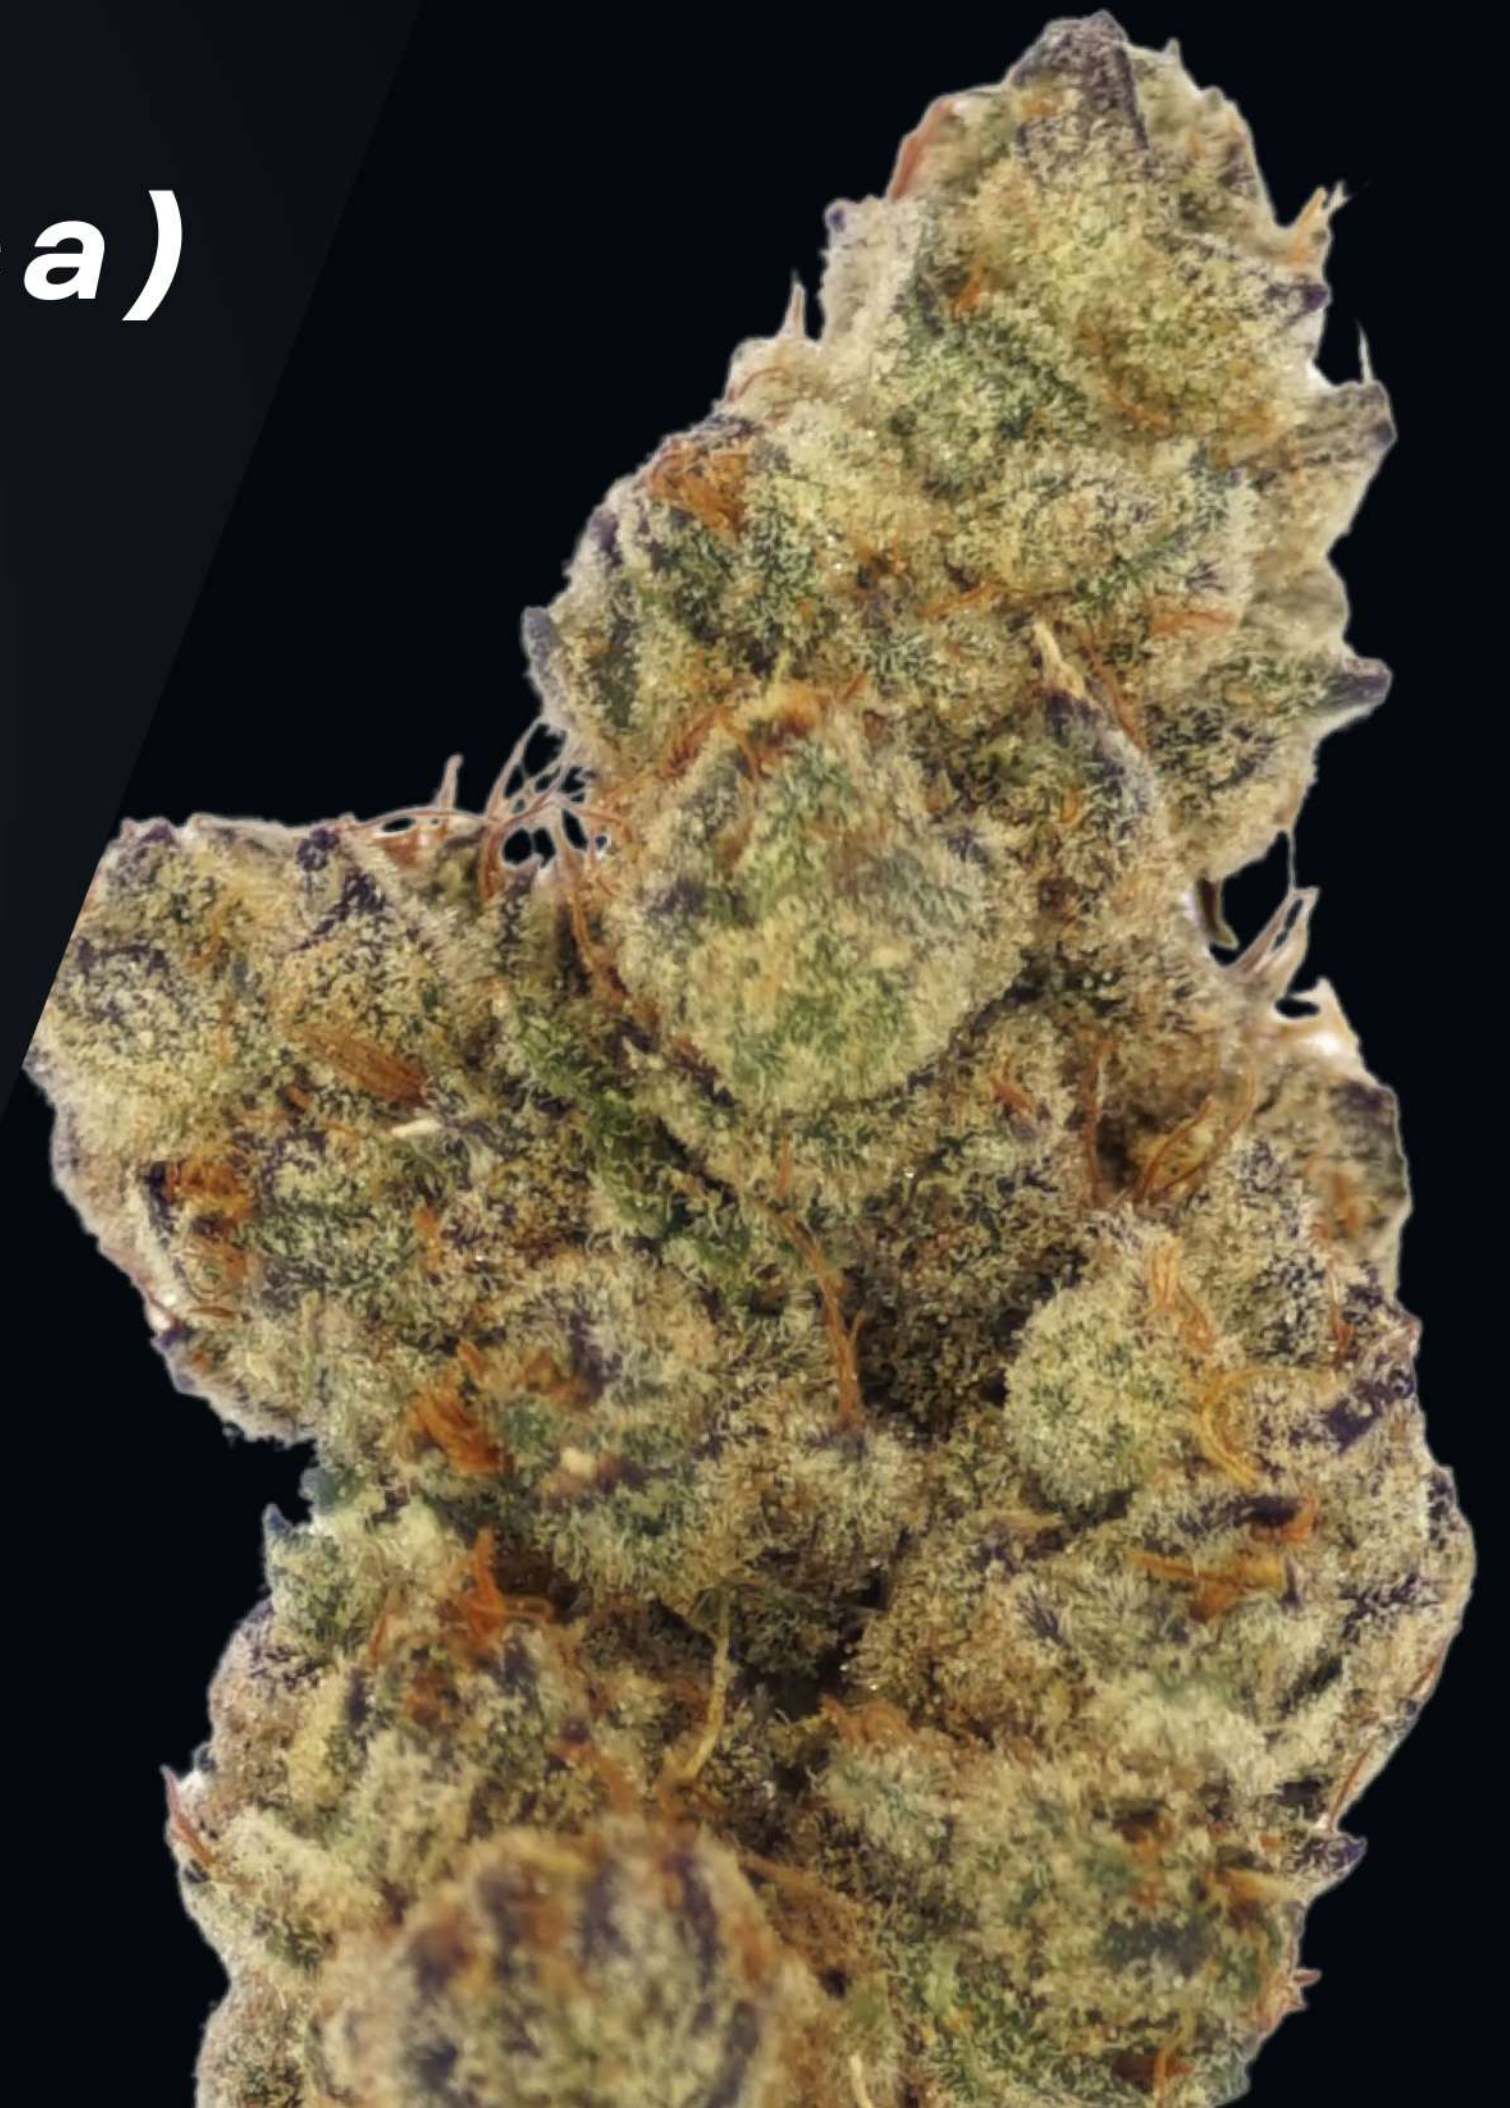

Pablo's Revenge (Indica)

Tiki Madman's take on Sherb/Mints is great! It has the traditional 'Mint OG' terps but the Sherb side spice is strong on the exhale. Soaring buzz with a busy plateau.

Lineage: Animal Mints X Sherb Cake Bred by Tiki Madman

Terpene Profile: Citrus/Pepper

Power (Hybrid)

Exotic combined Gary Peyton and Scotty 2 Hotty to create a large, beautiful, high yielding strain. The crystal production on this cut is outrageous and the colors are spectacular! Expect heavy eyelids after a sesh with Power!

Lineage: Gary Peyton X Scotty 2 Hotty

Terpene Profile: Rubber

Razzberry Rocket (Hybrid)

This cultivar is small but packs a lot of flavor. With its sweet gas terps and earthy exhale it is sure to please both flavor seekers and head stash junkies alike!

Lineage: Falcon 9 X OMFG

Terpene Profile: Berry/Incense

Red Bahama Runtz (Hybrid)

Lusty Lady gave a Red pheno and a purple pheno. The buzz is unique and has a “headband” quality after smoking it.

Lineage: Bahama Mama X Red Runtz

Terpene Profile: Fruity/Vanilla

Rubber Legs (Indica)

This cut of Power has its own unique look and a terp profile that is smackin! With all the F1's out there, this one needs a second look! Trichomed out and rubber band flavors bring you to your happy place very quickly!

Lineage: Gary Peyton X Scotty 2 Hotty

Terpene Profile: Rubber/Sour

Super Petrol (Sativa)

Super Petrol has a citrus gas combination that smells like a gas strain but has a clean palette on the exhale. Her light green complexion and pinkish red hairs are sure to get you there and her terp profile is topped out with .5% Limonene and .4% Myrcene to elevate and elongate the buzz.

Lineage: GMO X Rocket Fuel

Terpene Profile: Diesel/Spicy

Tangie Berry (Sativa)

Tangieberry is a sativa hybrid with all the orange terps plus a little peppery finish with its β -Caryophyllene content. This girl has a quick elevation and then a long plateau of energy.

Lineage: Dreadyberry x Tangerine Dreams

Terpene Profile: Citrus/Pepper

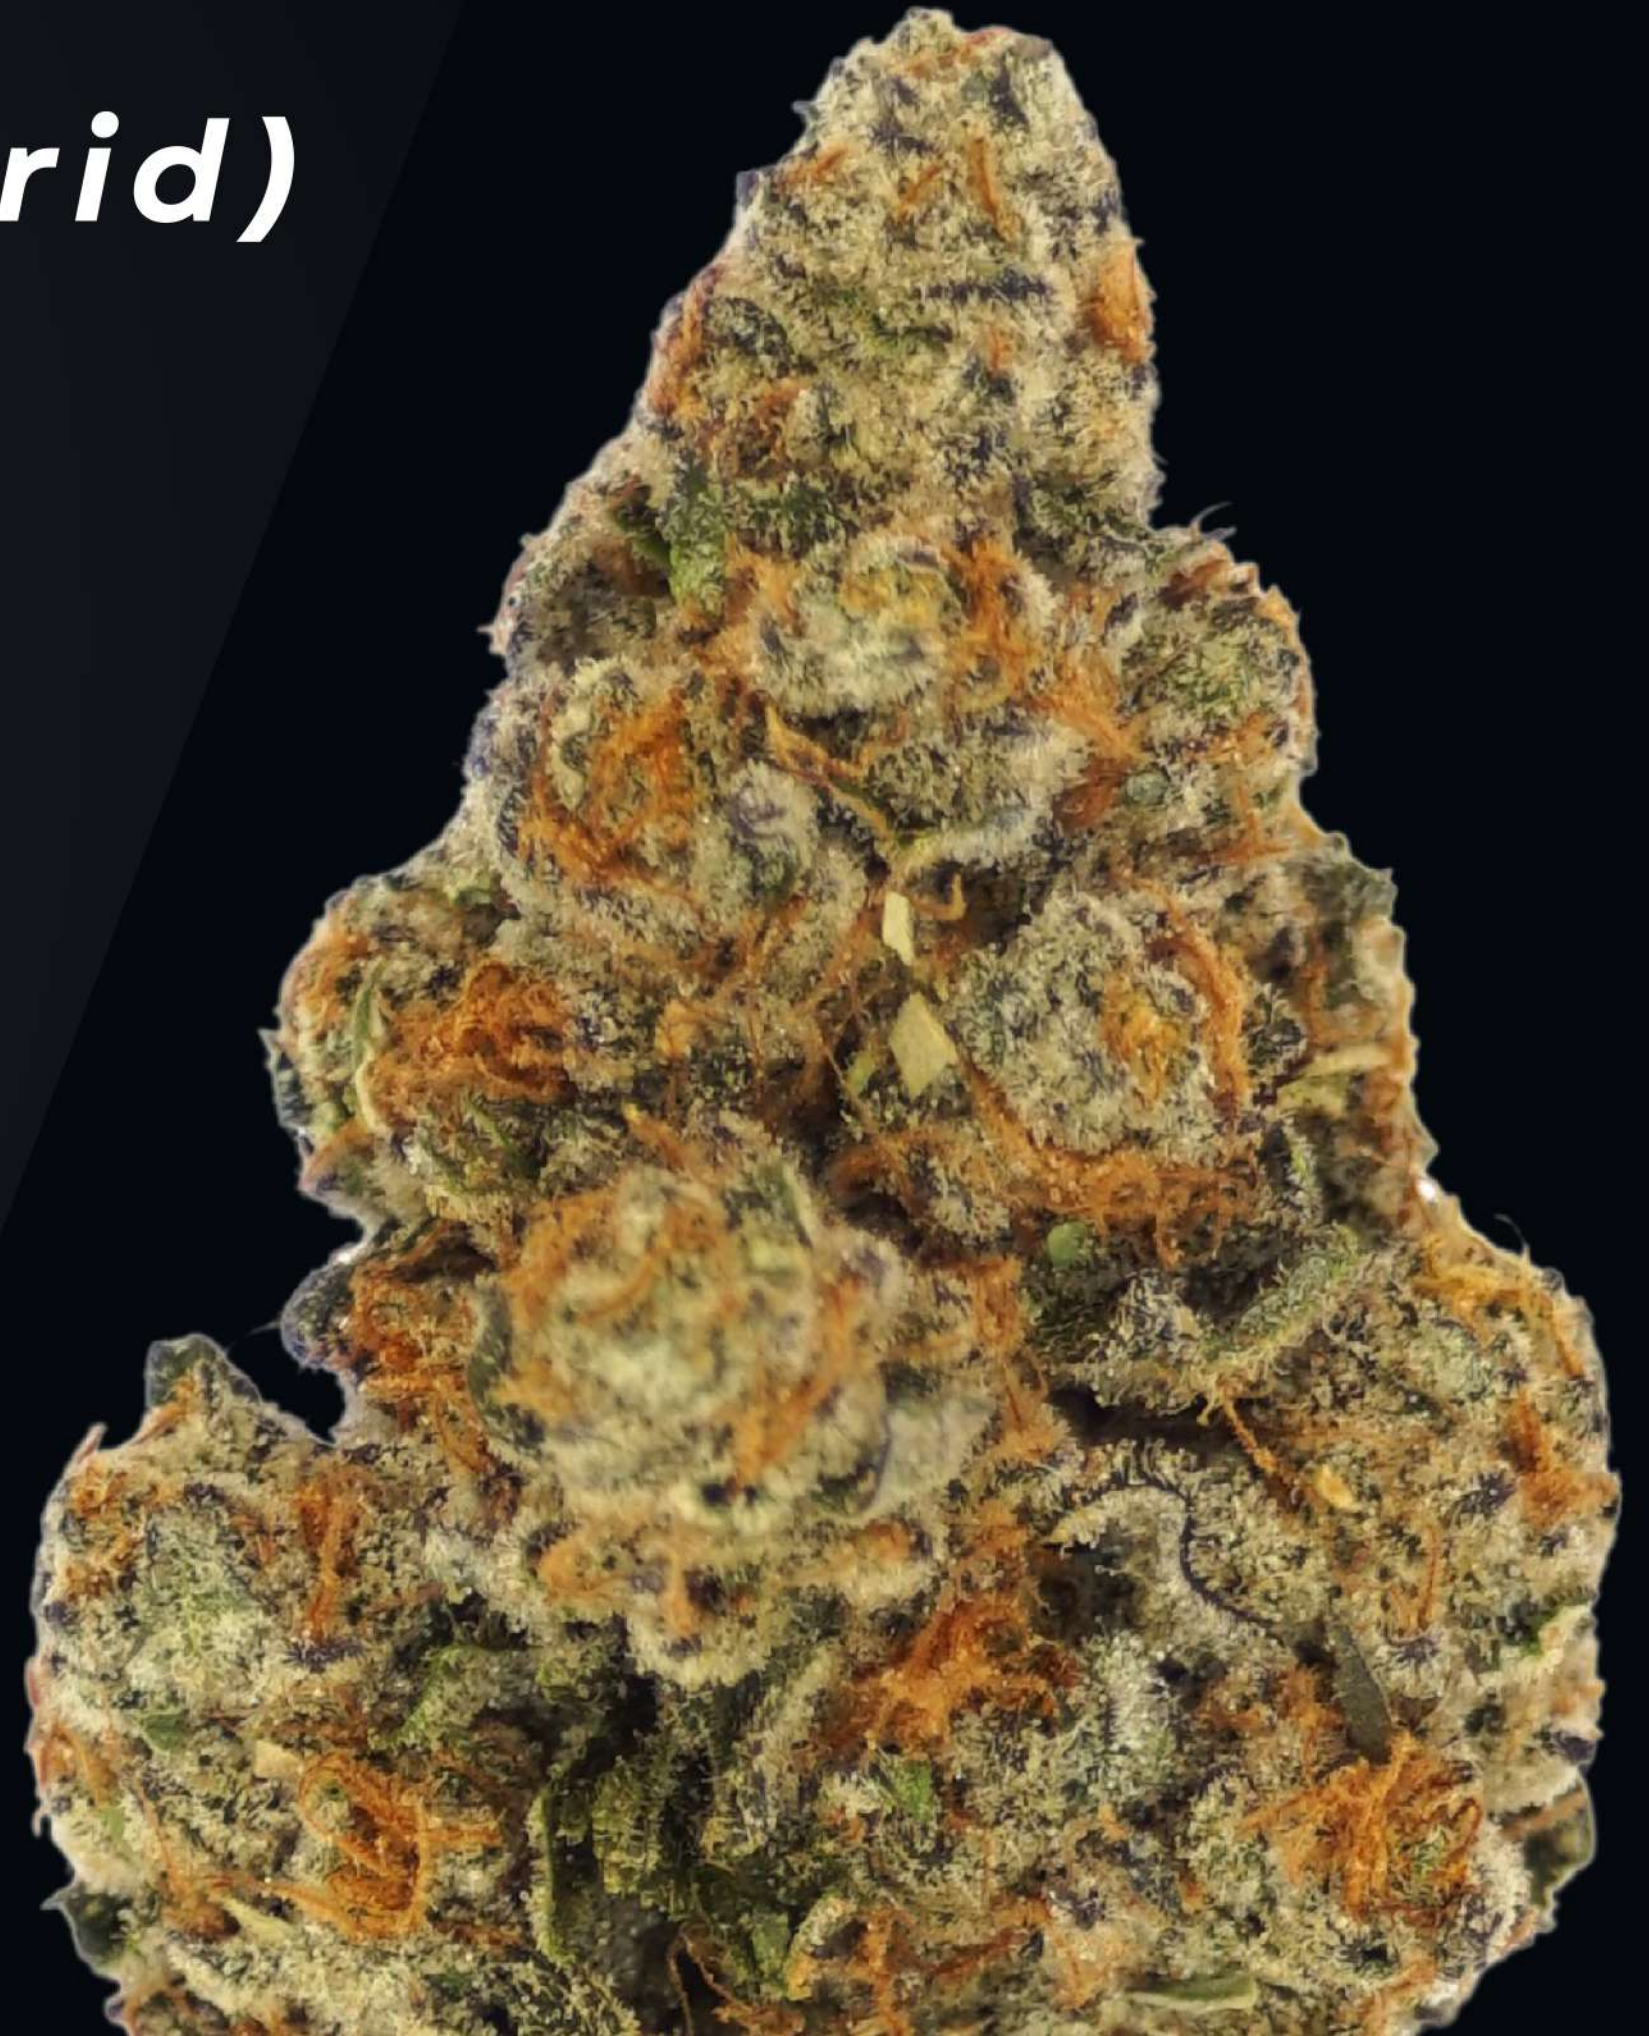

Windy City Mintz (Hybrid)

This is a new take on Mints adding an Old School Triangle Kush. The crystal profile on her is heavy stacking with large heads. The color on this cultivar is bright green with secondary purple and red hues. A strong head buzz is typical with a relaxing body high.

Lineage: Triangle Kush X Kush Mints Bred by Unknown

Terpene Profile: Earthy/Minty
